Milton Keynes

Starting up in Milton Keynes

Milton Keynes is the top city for business Start-ups outside of London

Una plans to deliver a real game changer for the events and ticketing industry and has chosen Milton Keynes as their home.

Our unique story is created in a city that is not just different, but is better by design. Better for the people who live and work here and better for the businesses that choose to locate here. Because of the visionary and imaginative city design, we can offer a wide choice of city centre development sites for your next project.

The US-style grid system of tree-lined boulevards makes Milton Keynes an easy city to navigate. Its famous roundabouts have created a free-flowing road system and some of the shortest commuting times in Europe. Therefore, less time stuck in traffic jams, which means more time either at work or at home.

Our businesses know that short and uncongested commuting makes for a happier and more productive workforce. Working and living in Milton Keynes gives you more time to spend on the amazing leisure, cultural and retail attractions available within the city.

Choosing Milton Keynes

“Doing business in Milton Keynes is unlike anywhere else in the UK”

“It is possible to be in London within 35 minutes and Birmingham within the hour. “The City was planned to perfection with businesses in mind. To sum up Milton Keynes in one word would be ‘convenience’, which is essential for business. It increases productivity which ultimately leads to growth” – Director, Una.

MILTON KEYNES
COUNCIL

About Una

“Being in Milton Keynes enabled us to build a strong network and raise over half a million pounds from local investors and government funding. We completed the investment within 72 hours and are now fully funded. We have also kept our accountants, lawyers and the majority of our contractors within the local area.”

Una has now grown from two to eight full-time employees within a 3 month period and we are still recruiting”. “It is certainly not easy to start a business but it does provide the satisfaction that no other job could fulfill”.

Working with Partners

“Invest MK were very supportive in the early days of my company as they listened to my needs and provided me with soft landing space in Central Milton Keynes”. “Invest MK understand that startups are the innovators and that they create both competition and jobs”.

“With a new co-working Tech Hub on the horizon which is supported by Invest MK, local charities and an investor network, Milton Keynes can be a home to startups and become a rival to London’s Silicon Roundabout”.

“The ticket industry has failed for many years to offer acceptable customer service or ethical trading”. “This is why I started Una - to put an end to the unjustified practices and finally give consumers a choice. We will also put an end to touting, counterfeit tickets and admin fees.”
“We will be launching into the UK music festival market in 2015. Once we have a foothold in the live music industry we will branch out into performing arts, theatre, sporting events and exhibitions”

Amar Chauhan, Director
